80's The Newark Conference

The Newark Conference is an informal grouping of persons who participated in the Conference on An Assessment of Newark, 1967-77 and are cooperating for the following purposes:

- 1.** To communicate the results of scholarly work and professional activities;
- 2.** To strengthen relations among ourselves and between the academic and civic communities in Newark;
- 3.** To demonstrate that intellectually exciting things can happen in Newark in the sciences, the technical professions, the arts and the humanities, and in other areas of creative human endeavor.

The geographic focus of our concern is the City of Newark. We welcome the participation and support of people who live and work in the city. We seek participation not only from academic colleagues but also from people in business, the professions, government, social and civic agencies, and community groups so that we may comprise and reach a cross-section of people in Newark.

Cosponsors of the October 14 Conference:

Greater Newark Chamber of Commerce

Newark Coalition of Neighborhoods

Essex County College

College of Medicine and Dentistry of New Jersey

New Jersey Institute of Technology

Rutgers — The State University — Newark

Essex County Private Industry Council

80's

Revitalization

Newark, New Jersey's largest city, in spite of decades of loss, is home to a great concentration of people of varied and changing ethnic and racial background. Notwithstanding decline in its industrial and commercial base, it still is a major educational, governmental, transportation and commercial center.

To many, Newark has become a symbol of urban decline; a city without hope. The Newark Conference does not accept this hopelessness. We see many signs of renewal in Newark's communities and a dedication to a positive future among its business enterprises. The purpose of this conference is to provide a public forum for bringing together those who have a stake in revitalization, principally the business community and the various neighborhood groups of Newark.

We feel that such a positive act will have a psychologically reinforcing impact for those already committed. It will provide an upbeat message for those who live and work in Newark.

80's
